TECHNOLOGY WITH THE POWER TO DESIGN.

OrangeTech is proud to partner with the Oklahoma State University College of Human Sciences to offer the following strategically selected and specially equipped technology at educational discounts for design, housing and merchandising students. Students majoring in Apparel Design & Production, Interior Design and Merchandising are required to have their own laptop computers with appropriate software capabilities including Sketch-Up, AutoCAD, Revit and Photoshop. Students will also need a subscription to Adobe Creative Cloud beginning in their sophomore year, which is available through OrangeTech. The DHM department recommends one of the two following laptops, however if you choose an Apple computer you may need Boot Camp installed to run Windows parallel with OS X. The department highly recommends that merchandising students have the MacBook Pro. These laptops will be available for you to order and/or pick up this summer during New Student Orientation. Plus, be sure to ask about available financing options or how you can use your financial aid to pay for your technology purchase. Contact OrangeTech for more information.
